Dear colleagues

After the two successful educational “Virtual Headache News” events from IHC in 2021 and from MTIS in 2022, which were developed primarily for the pandemic situation, we decided to continue with this format even after COVID-19 has ceased to be the center of our daily planning.

A virtual event offers a large audience the possibility of participation even with spontaneous dial-in, and it saves travel time for professionals from all over Switzerland, who share our interest in headache.

A group of headache experts from Switzerland will attend the International Headache Congress 2023 and summarise the most important scientific presentations, research results and highlights for you in a 2-hour virtual meeting.

We would like to invite you to this subsequent virtual meeting with live broadcasting and the opportunity to exchange ideas with the experts.

Together with our sponsors we would therefore like to invite you to

Virtual Headache News from IHC 2023
on Thursday, 28th September 2023 from 18:00–20:00

Please see the registration information on the back page.

We are looking forward to a large number of participants!

Andreas Gantenbein

Christoph Schankin

Nina Bischoff

Scientific Committee

Prof. Dr. med. Andreas Gantenbein
